Easily movable and capacious

Otto coat rack set

Otto coat rack set is an excellent choice for event spaces and environments where the number of users varies due to its large coat capacity. The coat rack group consists of three separate racks. The large wheels make the coat racks easy to move and versatile. Depending on the number of users, the necessary number of coat racks can be taken out, and after use, storing the coat racks takes up little space as they nest inside each other.

Otto is a project product.
