

Stylish and
space-optimized
design

Kaita recycling unit

Kaita is a space-optimized designer recycling unit that enables efficient sorting even in narrow corridors and tight spaces. With two size options, a designer-curated color palette, and flexible placement, Kaita adapts seamlessly to any environment.

The durable design and replaceable parts make Kaita a long-term, sustainable investment. Its high capacity within a slim frame simplifies maintenance, while optional wheels ensure effortless mobility. Kaita is an elegant and flexible solution for a smoother waste sorting experience.
